

Logging in to collect data

1. Log into Desktop by selecting your name or “not listed?” and entering your UM username and Kerberos password.
2. Double click Topspin to open.
3. If needed, in the directory panel of Topspin, right click, select “Add new data directory” and browse to your data directory, which should be “home/username/data”.
4. If you need IconNMR, type “iconnmr” in the Topspin command line.
